Press release from: [BKS Marketing](#)

Calgary, AB November 10, 2006 - The MIM-Amigos (www.nhl-amigos.com/worldwide) of Natural Health Labs (Amigo Health) announced the release of a brand new energy drink called Amigo Charge. The all-natural energy drink contains a mix of three Superfoods - Goji, Mangosteen and Acai, 1000 milligrams of each, along with other natural ingredients like Phenylethylamine and Guarana known to help with energy, mood, focus and vitality.

The majority of the energy drinks out there contain large amounts of caffeine, sugar and high sodium content. These kinds of ingredients can cause a person to have a dramatic drop in energy once the sugar leaves the bloodstream, resulting in sluggishness and mood changes. Natural Health Labs will define their product using all natural ingredients boasting the result will be more energy without the jittery side effects.

“What is so powerful with Amigo Charge is that it’s all natural, giving you an instantaneous increase in energy, focus and mental alertness without the harsh jolt to your system. Energy drinks are a billion dollar industry and Amigo Charge’s ingredients put them above anything out there,” said Kelly Smith of MIM-Amigos.

Phenylethylamine or PEA is actually a mood-boosting chemical produced naturally in the body also known as the “runner’s high.” It has been popularized in the media because it’s also contained in chocolate and said to give people feelings of well being and feelings of love. What it does is actually increases endorphins, the chemicals that give one a euphoric feeling also known as the ‘runner’s high’. Theobromine, also contained in Amigo Charge is known for its effects in chocolate and is said to provide a mental boost.

Guarana is made from the seeds of a native Brazilian plant and is described by Naturopathic doctors as a gentle stimulant that gives a gradual, steady boost of energy. It’s also known for helping to reduce weight, increase the libido and have diuretic properties.

Amigo Charge contains two ginsengs. The Panax Ginseng is said to revitalize and rejuvenate the body, which boosts the immune system. Siberian Ginseng is said to help relieve fatigue, increase energy and stamina. It’s also thought to improve memory, concentration and energy minus the side effects.

The three Superfoods contained in Amigo Charge - Goji, Mangosteen and Acai have already become widely known through the networking and media industry. The Acai berry has become widely known for its anti-aging properties due to being featured on Oprah where anti-aging expert, Dr. Nicholas Perricone boasted the Acai berry as one of the most nutritious and powerful foods in the world. It is also said to lower cholesterol levels and promote a healthier cardiovascular system.

The Goji is becoming widely known for its properties and is said to promote longevity and energy. It is also nick named, the “happy berry” because it is said to promote cheerfulness and vitality.

The Mangosteen pericarp is known for its level of Xanthones. The pericarp or outer shell contains the highest level of Xanthones, which have shown in laboratory tests to have activity against several cancer cell lines. It is also known for its antihistamine and antimutagenic properties.

Naturopathic physicians who are joining Amigo Health for its quality product have said the combination of three superfoods - Goji, Mangosteen and Acai, just enhance each other, when digested and released into the body actually alkalizing the body.
