

## **1.8 times more acoustic neuroma after ten years mobile phone use was found**

Date: 04.04.2008 - 12:28

Category: [Media & Telecommunications](#)

Press release from: [Buergerwelle Germany \(incorporated society\)](#)

October 2005, Interphone researchers did not inform the public that 1.8 times more acoustic neuroma after ten years mobile phone use was found. Instead, they told the media that there is no heightened risk (Interphone study by M.J. Schoemaker, A.J. Swerdlow, S.J. Hepworth, P.A. McKinney, A. Ahlbom and others). Reuters forwarded the message to the world apparently without checking the report.
