Date: 04.04.2008 - 12:28

Category: [Health & Medicine](#)

Press release from: [Radiance Medspa of South Miami](#)

Radiance Medspa is the nation's number one source for non evasive cosmetic procedure information. Radiancesouth.com is a growing website dedicated to providing up to date and accurate information on any and all Botox and Restylane dermal fillers. Potential patients can feel confident when visiting [www.Radiancesouth.com](http://www.Radiancesouth.com) because this site can answer all skin rejuvenation questions and address all cosmetic procedure concerns.

Radiance Medspa of South Miami has recently added several skin rejuvenation and cellulite reduction procedures to their list of services. These treatments include Botox, Restylane and Mesotherapy. Botox has become a very popular non-surgical injection that reduces and/or removes emotionally caused lines on a temporary basis. When Botox is injected into the skin, it temporarily immobilizes the muscles that cause wrinkling and, at the same time, gives the skin a smoother, fresher appearance. Potential patients are directed to the following website to address all their concerns at [www.Radiancesouth.com/botox-miami.html](http://www.Radiancesouth.com/botox-miami.html).

Restylane on the other hand is a natural beauty filler that mimics material found within the body. It is a non-animal, biodegradable gel that is based on a natural substance called hyaluronic acid. This acid is found naturally within the human body and provides natural volume and fullness to the skin. Additional information on Restylane in the Miami area is available at [www.radiancesouth.com/restylane-miami.html](http://www.radiancesouth.com/restylane-miami.html).

Mesotherapy is a safe, non-invasive procedure used to treat cellulite, improve overall skin tone and decrease wrinkles. Mesotherapy uses microinjections to deliver vitamins, minerals and amino acids into the mesoderm or middle layer of the skin. This is done in order to promote metabolism, stimulate the production of collagen and elastin and nourish and revitalize the skin.

BOTOX® Cosmetic was developed by Allergan and softens facial wrinkles caused by repetitive motions, such as smiling, squinting, frowning or other facial expressions. Called "dynamic wrinkles," these lines are often found between the eyebrows, across the forehead and at the corner of the eyes. BOTOX® Cosmetic temporarily relaxes the muscles so that the wrinkles smooth out, leaving the patient looking younger and more relaxed. Results typically last up to six months; however a Canadian study suggests that combination treatment with RESTYLANE and Botox is more effective than either product on its own for correcting glabellar lines (lines between the eyebrows). The study comprised 38 women with moderate to severe glabellar lines who were randomized to receive RESTYLANE alone or Botox plus RESTYLANE.

The combination of RESTYLANE and Botox proved significantly more effective than RESTYLANE alone over a 28-week follow-up period. The study also revealed that injection-related pain was rated as lower when RESTYLANE was injected after Botox, suggesting that Botox has some analgesic effect. (Carruthers, A. New evidence of hyaluronic acid (NASHA) as a dermal filler. 11th congress of the EADV, Prague, Czech Republic; 4 Oct 2002) For more information and before and after photos, people can read about BOTOX® Cosmetic at [www.Radiancesouth.com/botox-miami.html](http://www.Radiancesouth.com/botox-miami.html).

In addition to Botox, Restylane and Mesotherapy, Radiance Medspa of South Miami also offers a variety of hair removal and skin rejuvenation procedures. Whether potential patients in the Miami area are looking for hair removal, skin rejuvenation or cellulite reduction treatments, the Radiance Medspa of South Miami can now provide numerous treatments that can lead to smoother, healthier, younger looking skin.

To find out more information about Radiance Medspa of South Miami as well as other hair removal clinics, visit [www.Radiancesouth.com/botox-miami.html](http://www.Radiancesouth.com/botox-miami.html).

Radiance Medspa of South Miami provides interactive online consultations as well as precise analysis that will help potential

patients determine if laser hair removal is right for them. Results will reveal whether or not the potential patient is an ideal candidate for laser hair removal.
