Compact, Wall-Mounted System Makes Any Seat “The Best Seat in the Room”

Carson, Calif.--June 26, 2008 -- OWI Inc, a manufacturer of advanced audio equipment for AV integrators, commercial, industrial and residential markets, will be debuting the CRS-101 Infrared Wireless Microphone System during the National Educational Computing Conference in San Antonio, Texas, from June 29 to July 2, 2008. NECC will be held at the Henry B. Gonzalez Convention Center on The Riverwalk. OWI will be demonstrating the CRS-101 System at its booth #5269.

“The education market has embraced technology’s role in the 21st century classroom but currently many school districts have limited budgets. The CRS-101 Wireless System’s affordable price and easy installation puts all the advantages of an amplified classroom within reach of even the most modest school budget,” added Martinez.

The CRS 101 Infrared Wireless Microphone System is ideal for Classrooms, Boardrooms, Training Rooms and Hotel Meeting Rooms. The slim, fully lockable, wall mounted, infrared receiver/amplifier/mixer accepts three different line level inputs. Because the CRS-101 is wall-mounted, there are no freestanding or bulky rack-mounted components to take up closet space or be knocked off a shelf, and no unsightly tangle of wires.

The CRS-101 System can simultaneously control two included infrared wireless microphones, and each device’s volume can be independently adjusted to obtain the best audio effects for each individual room layout. The CRS-101 System comes complete with two OWI ceiling speakers. Further sound customization can be achieved by adding two more optional OWI ceiling or surface mounted speakers. The complete system is attractively priced at \$990.

OWI has a 30-year history of consistently bringing innovative products to the audio market. They offer a full line of high-end speaker products including indoor/outdoor speakers, self-amplified ceiling, in-wall and trumpet speakers, pendant speakers, and weatherized speakers. Their weatherproof speakers and L.A. Rocker line of rock-shaped speakers are in use around the world at major theme parks, hotels, casinos, golf courses and retail centers.

The OWI CRS-101 Infrared Wireless Microphone Audio System and other OWI brand audio enhancement products are available through authorized OWI dealers nationwide. Please visit www.owi-inc.com for more information.

About OWI

OWI Incorporated was founded in 1978 as a loudspeaker manufacturer. The company's pioneering lines of outdoor/indoor, weatherized and weatherproof speakers are considered the industry standard. As a company, OWI is dedicated to research and development. This emphasis has led to an expanded product line of award-winning sophisticated audio equipment for the AV integrators, commercial, industrial and residential markets.

The company is known worldwide for its rock and landscape garden speaker collections, rock subwoofers, surface mounted, in-ceiling and in-wall speakers, trumpet speakers for paging and music and BSK waterproof shower speakers. Through internal research and development efforts, OWI has created many breakthrough products including Self-Amplified In-ceiling and Trumpet Speakers, 70 Volt In-wall Amps, and compact, in-wall mounted Control Center and Media Center control modules. The newest offering is a wall-mounted Infrared Wireless Microphone System for classrooms, boardrooms, training rooms and meeting rooms.
