ASP.NET 3.5 Black Book, Beginners Edition is the latest release from the umbrella of Dreamtech Press. The book, ASP.NET 3.5 Black Book (Beginners Edition) is the one-time reference book, written from the programmer's point of view, containing hundreds of examples and covering nearly every aspect of ASP.NET 3.5 in both VB and C#.

As the back cover of the book highlights, it will help you to master the entire spectrum of ASP.NET – from features of ASP.NET 3.5 to securing ASP.NET 3.5 pages, from standard and advance controls to CSS Style Manager, from web services to WCF services, from Web parts controls to AJAX, from master pages and Themes to Silverlight. It details the new features, which include: CSS Style Manager, ListView and DataPager Controls, AJAX Control Toolkit and WCF Services.

In addition, the book also includes code snippets and executable applications to demonstrate the implementation of various concepts related to ASP.NET 3.5. The book is designed to help you:

- Work with various ASP.NET 3.5 controls – Standard, Validation, Data, Navigation, Login, and Web parts.
- Personalize websites with the help of Web Parts
- Get an insight into various technologies – AJAX and Silverlight
- Use master pages for applying a single theme for a complete web application
- Understand the concepts of Caching
- Work with Web Services and WCF services
- Track an application using Performance Counters and Trace Class
- Display personalized information on websites using user profiles.

The book has been written considering the diverse audience of ASP.NET 3.5, and promises an exceptional learning experience by presenting relevant, appropriate, and real-life examples. This book is equally beneficial for those people who want to learn ASP.NET from scratch or who are already involved in developing applications in ASP.NET 3.5.

This book is the result of rich implementation of instructional acumen and technical precision of the authors and editors at Kogent Learning Solutions Inc. and Dreamtech Press.
